

5

Diagram illustrating step 5 of the assembly process. The main drawing shows the front view of the cabinet with a callout indicating a depth of 62 mm. A warning icon shows a person should not stand on the cabinet.

Parts list for step 5:

- J11 x1
- G22 $\phi 18$ x1
- T17 $\phi 8$ x1

Assembly steps:

1. Drill a hole with a $\phi 8$ mm drill bit.
2. Insert the G22 spacer.
3. Tighten the T17 screw and attach the J11 bracket.

6

Diagram illustrating step 6 of the assembly process. The main drawing shows the cabinet being leveled. A callout shows the J11 bracket. A spirit level is used to check the cabinet's level, and L4 spacers are used to adjust the height.

Parts list for step 6:

- L4 x2
